

GENERAL SAFETY

Please read this guide carefully prior to operating equipment.

MOST IMPORTANT –RISK ASSESS

Before you commence any work at your chosen work area, you should undertake some preliminary hazard identification and risk control precautions. Ideally more than one person should do this.

This is undertaken by:

Physically inspecting the work site.
Reviewing the best way / job steps required to complete the task.
Reviewing the Safe Work information supplied with the equipment.
Reviewing other reference documentation and expert advice.

The hazard identification and control process steps are defined as:

Identify the hazards (e.g. 240v power drill use around wet areas)
Assess the Risk (multiple earth paths – possible electrocution)
Select the control measure (e.g. dries the area, use an RCD, use a cordless drill etc.)
Re-assess the risk. (risk of electrocution now negligible) This is undertaken to ensure that the risk control measures adopted have not introduced any new risks to the work area.

HELP

If the unit does not operate or you are unhappy with its performance, return it to our Hire depot for exchange or call for assistance. Do not attempt repairs yourself.
Refer to your hire contract for contact information.

SAFETY DO'S

DO take the time to read this User Guide and any other safety information provided (e.g. Decals, manufacturers instruction booklets), completely before operating any equipment.
DO satisfy yourself that you have the correct machine for the job and that you are aware how to safely operate it.
DO ensure you fully understand and are familiar with its operation including emergency shut off procedures.
DO ensure that the equipment is assembled and used according to the manufactures and hires instruction.
DO check controls and any other safety devices.
DO make sure you hold a possess a Certificate of Competency issued by the Regulatory Authority where required by particular equipment.
DO where possible operate in a clear work space free from non-essential persons.
DO ensure that you have secure footing and clear access to the work area.
DO ensure that the work area is well lit with all aspects of the job easily seen.
DO ensure correct lifting techniques are used when using or transporting any machine or equipment.

SAFETY DONT'S

DO NOT operate any equipment if you are tired or suffering a medical condition, or if under the influence of Alcohol or drugs which, may cause drowsiness.
DO NOT hurry or take risks.
DO NOT operate equipment without guards correctly fitted.
DO NOT operate faulty equipment. If in doubt call your nearest Hire Depot.

LP Gas Radiant Heater Safety Instructions

Read and understand these instructions before using this equipment.

Safety Instructions for this Equipment

- Use only L.P. Gas in this barbeque. Incorrect gas being used can cause explosion, placing the operator or by-standers at risk of being seriously burnt or injured by disintegrating machine components.
- Keep hands feet and loose clothing away from the barbeque. Keep barbeque at least 600mm clear of all combustible surfaces.
- Never continue to operate gas barbeque if you can smell leaking gas. To check for gas leaks use only soapy water: never a naked flame.
- Operator or by-standers can be injured if gas lines are holed or burst. Always turn off gas immediately.
- Gas bottles should be stored securely when operating barbeque to avoid them tipping over and possibly bursting gas lines which could be ignited by gas flame which could cause serious burns. Do not operate barbeque in the presence of airborne contaminants including fumes, dust and vapors which have the potential of causing an explosion.
- Do not operate barbeque Inside tents, marquees or any closed room or area.

Safety Equipment

The following protective equipment **MUST** be worn when using this equipment:

- Dust mask and safety goggles if in a dusty environment
- Ear muffs or ear plugs
- Long sleeve shirt and long pants
- Leather boots with steel capped toes

LPG Fuel Safety

- THIS PRODUCT IS HIGHLY FLAMMABLE. READ THIS LEAFLET BEFORE USE.
- MAKE SURE you have the right size of regulator to fit the cylinder's valve - ask your dealer if in doubt.
- CYLINDERS should always be stored upright so the built-in pressure relief valve can operate if necessary.
- ALWAYS use gas appliances in a well ventilated area, and preferably provide ventilation at low level.
- KEEP cylinders away from heat and ignition sources and don't let children interfere with them.
- NEVER use any gas appliance, or store a gas cylinder, inside a property below ground level, such as in a cellar or basement. This is because LPG is heavier than air and any leaking gas will collect at low level.
- CHANGE cylinders in a well ventilated area, away from sources of ignition such as naked flames, cigarettes, car batteries etc.
- No ignition source shall be closer than 1500mm horizontally to the base of the cylinder or 500mm to the cylinder tap and relief valve..
- TREAT all cylinders, empty or full, as FULL.

General Safety

- Do not use machinery if you feel tired or under the influence of alcohol or drugs.
- Check controls for proper response. Shut down the machine if a fault is detected.
- Do not wipe plastic parts with solvents, such as petrol, thinner, alcohol and ammonia, as they will damage and crack plastic parts.
- Wipe parts with a soft cloth lightly dampened with soapy water.
- Always use the right tools. Never force a tool or attachment to do a job for which it was not designed. When using attachments, ensure they are fitted correctly and practice the operation before beginning work. Always use recommended accessories only.

- Always keep guards in place and in working order.
- Do not wear loose clothing, gloves, neckties, rings, bracelets or other jewellery which may get caught in the moving parts.
- Do not overreach. Ensure proper footing and balance when working with the tool.
- Always keep the work area well lit.
- Never permit children, other people or animals to loiter near the work area.
- Do not fool around while operating, always keep the machine under control.
- Never leave a machine running while unattended.
- Do not use or continue to use faulty or damaged equipment.
- Check the condition of the machine at the end of each day and report any damage or defects.

REMEMBER: In the event of death, serious injury or a dangerous occurrence you must notify WHSQ 1300 369 915. For further information or if in doubt over the use of this equipment, contact the supplier and ask for instructions.
